FICTIONAL SAMPLE RESUME

Alex Chen

Software development

Your email | Your LinkedIn | Your portfolio link

PROFILE

I build thoughtful interfaces and make the logic behind them easy to follow.

EDUCATION

B.S. Computer Science

Westbridge University | Expected May 2027

EXPERIENCE

Software Development Intern | Harbor Digital Lab

May-August 2026

- Built reusable interface components and documented loading, error, and empty states for review.
- Translated supervisor feedback into small interface changes and checked keyboard navigation.
- Wrote sample query and validation cases for an internal reporting-tool concept.

SELECTED PROJECTS

Studyboard | Spring 2026

Individual interface and data-model concept. Three task states, one weekly view. A small tool becomes easier to trust when its state changes are predictable.

Club check-in | Fall 2025

Workflow and validation-rule design. One attendance record per event and member. Use constraints to protect the data instead of relying on the interface to prevent every mistake.

Campus resource finder | Summer 2026

Search interface and content-model concept. Filters with visible results and reset. A directory is only useful if the information is both findable and maintained.

SKILLS

JavaScript | React | Python | SQL | Accessible interfaces

All names, organizations, work histories, and project scenarios are fictional demonstration material. Modeled or synthetic results are not real-world achievements.
